MD 9

READY FOR DUTY

Meet your new favourite coach - the MD 9 will never let you down and meet all of your requirements. Thanks to its reliable and robust structure along with a classy and comfortable interior design, the MD 9 offers drivers and passengers a unique experience. And with its superior safety features and fuel saving performance, the MD 9 ticks all the boxes.

TRAVELLING INTO **A NEW DIMENSION**

All journeys on MD 9 offer a unique sense of quality thanks to its spacious interior design and adjustable seats. With its modern, comfortable seats and powerful air conditioning MD 9 makes every journey a pleasurable one for passengers while the drivers also benefit from a range of userfriendly features. The cockpit is ergonomically designed with robust features and additional safety systems which allows for an enjoyable and uninterrupted driving experience.

DESIGNED WITH **DRIVERS IN MIND**

We know the small details matter and that's why we consider every aspect of the driving experience. The cockpit area is designed with safety and comfort in mind for drivers on long and challenging journeys. The seat features a support that is designed to prevent extra load on the back of the driver as well as two armrests on the left and right. Other features that enhance the driving experience include automatic transmission, electric sun visor, electrically-operated driver window and powerful air conditioning system. The microphone on the dashboard allows the driver to communicate with passengers, easily, clearly and safely.

MD 9 is designed for safety with features including cruise control, tachograph and advanced braking systems ensuring a peaceful journey for drivers and passengers.

MD 9

OUTSTANDING COMFORT,
FIRST CLASS STANDARDS

MD 9

In our MD 9 all you have to do is choose which optional features you would like. Depending on your requirements, the MD 9 can cater for a variety of seat capacities including 39+1+1 or 34+1+1+WC. Whichever specification you choose the MD 9 has three-point seatbelts with reclining seats that can be widened sideways. USB chargers also allow for enjoyable long journeys for passengers.

With MD 9 all your needs are met with a touch of excellence. On MD 9 the comfort of your passengers is guaranteed. The ergonomic luggage rack is designed to be easily accessible and the multiset provides a personal space for passengers while the air conditioning system also ensures an enjoyable and pleasant environment. The cooler is placed on the dashboard as well as a handlebar near the door to assist passengers boarding the coach.
At the same time, the MD 9 PSVAR - Compliant provides accessibility to all its passengers with its many features such as Destination Boards, Stop Lamps, and non-slip steps.
All you have to do is ask - the MD 9 will do the rest for you.

MAXIMUM EFFICIENCY, **MAXIMUM PERFORMANCE**

MD 9 works harder and longer for your business. The Cummins ISB6.7 engine stands out with low fuel consumption and environment-conscious performance. The 6.7-litre engine offers 1100 Nm @ 1000-1400 rpm, generating 204 kW (280 HP) of power, and gives a truly outstanding driving experience.

MEET THE MD 9 WITH IMPROVED SAFETY FEATURES

THE MOST COMFORTABLE JOURNEYS BEGIN WITH SAFE DRIVING EXPERIENCE. MD 9 IS YOUR RELIABLE ASSISTANT IN YOUR JOURNEYS, WITH SAFETY SYSTEMS TO PROVIDE A HIGH LEVEL OF SUPPORT.

ABS (Anti-Lock Braking System)

Anti-Lock Braking System (ABS) allows the driver to hit the brakes suddenly yet without losing control. It prevents the locking of the brakes, reducing the stopping distance while also improving handling to ensure a safe driving experience even when sudden braking is required.

ESP (Electronic Stability System)

Electronic Stability System (ESP) protects your coach in challenging road conditions. It manages the engine's operating system to provide different levels of traction for each wheel. Combined with different braking power for individual wheels this provides the optimum level of traction with road and prevent loss of control in the event of sudden steering interventions and sharp cornering.

ASR (Anti-Slip Regulation)

Anti-Slip Regulation (ASR) is developed to prevent loss of traction with the road. This prevents skidding , allowing the coach to start moving even in difficult road conditions. It also enhances driving safety on slippery surfaces and prevents excessive wear of the tyres.

AEBS (Advanced Emergency Braking System)

Advanced Emergency Braking System (AEBS), offers automatic braking capability in case of danger. It automatically intervenes in response to sudden developments which pose a risk of a crash, and helps prevent or reduce the impact of potential crashes.

EBS (Electronic Braking System)

Electronic Braking System (EBS) offers the highest level of safety for the driver during braking. It is integrated into an electronic system combining the brake controls, ABS and ASR to produce superior results over shorter braking distances and lower levels of disc wear.

(LDWS) Lane Departure Warnin System

Lane Departure Warning System (LDWS) alerts the driver with both an audio and vibrating warning whenever the coach leaves its current lane. The system helps the driver to stay within the lane and alerts him/her if the coach veers dangerously.
